- Long working life
- No maintenance required
- Tested to high safety factor to insure safety & reliability
- Exceeds all industry and MIL standards
- Engineered, Manufactured and tested at the Rayotek U.S. facility

CF (ConFlat™) flange sight windows are used for clean, ultra high vacuum and low pressure applications. Designed specifically for applications where cleanliness, chemical resistance and/or process control are critical. The window material is fused or bonded to a stainless steel housing forming a hermetically sealed single-piece part. The advantage of this construction is a simple, clean, easy to install sight window.
