

Delivering the Performance Your Customers Demand

As the world leader in delivering unparalleled solutions for the most demanding industrial applications, McDanel understands the durability, reliability, and performance required for strip steel manufacturers so they can, in turn, fulfill the demanding specifications required by their customers.

Now, McDanel has once again raised the bar.

Introducing InX™, an advanced material solution for journal protection, meticulously engineered to operate in harmony with our WearGuard® bearing system.

Together, InX™ and WearGuard® bearing systems deliver the industry's most powerful results with unmatched durability and performance that are redefining the standards – and the expectations – around uptime and line speed efficiency.

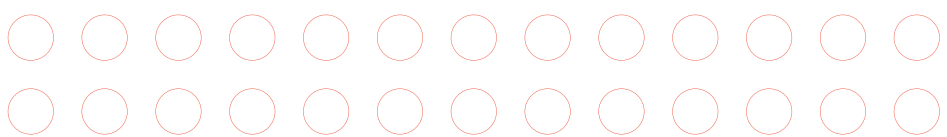

Exceeding Expectations

Industry-Leading Lifetime and Quality: InX™ offers an extended lifespan, achieving five to six times the longevity of competitive products. This ensures your lines maintain maximum operational productivity, reducing the need for frequent maintenance and replacements.

Low-Friction Performance: Our advanced material technology significantly minimizes friction, reducing startup vibration and maintaining smoother operation throughout the campaign. This low-friction property enhances the overall stability and consistency of your manufacturing process.

Custom-Designed Applications: The experts at McDanel understand every manufacturing line is unique. That's why InX™ is custom designed to fit seamlessly with your system, ensuring optimal performance tailored to your specific operational needs.

Increased Line Speeds: The combination of InX™ and WearGuard® enables you to push your lines to their limits, achieving maximum line speeds providing prime quality.

The Toughest of the Tough: When Others Fail, We Deliver

InX™ and WearGuard® are engineered to withstand the most demanding environments in steel manufacturing. While other products falter under pressure, our materials stand resilient. This makes them the ultimate choice for plants looking to maximize their performance, longevity, and output.

By choosing McDanel's InX™ and WearGuard® solution, you are investing in the toughest solution available on the planet – a system built to excel where others fail, providing peace of mind and operational excellence.

Experience the InX™ Advantage

Don't settle for less when it comes to the performance of your steel manufacturing lines. Discover how InX™ and WearGuard® are revolutionizing operations with unbeatable durability, reduced downtime, and increased speeds.

Contact McDanel today to schedule your complimentary line performance audit. Visit mcdanelceramics.com to learn more about how we can help drive performance for your customers.
